

Synthetic Lawn Bowling 101

When thinking of converting your natural grass green to synthetic here are a few key points to address:

1. Assessment of Current Facility

- Size
- Drainage
- Curb
- Plinth
- Perimeter amenities (benches, walkways, water fountains etc.)

2. Budget

Cost of Civil Works

Civil work budget includes: sidewalk, plinth, curb, excavation, drainage and install of permeable aggregate.

\$260,000.00 (this number will vary depending on scope and difficulty of civil work)

Cost of Underlayment and Carpet

Supply and install with Bowls approved Dales Master Green carpet, includes 20mm elastic layer.

\$130,000.00

3. Permits

Coordination with municipal partners

4. Construction Timeline

Timeline will depend on scope of work. Additional work involving perimeter amenities will add to the suggested timeline. The standard construction time frame is 2 months.

- 6 weeks for civil work
- 2 weeks for underlay and carpet

Every project is unique, and every project comes with its own challenges. Marathon has a team of professionals equipped to deal with and find solutions to any obstacle encountered.
